About This Content

Welcome to Trauma, the second add-on content pack for Alien: Isolation. This pack features three all-new maps for Survivor Mode, a time-based challenge to test your skills.

Face off against a range of enemies across the medical bays of Sevastopol station. Will you evade, distract or confront them? You'll have to act fast if you want to survive.

- Three new maps, including a claustrophobic scramble through the Sevastopol vents.
- Play as Chief Medical Officer Lingard and get faster access to Medikits and distraction IEDs.
- Destroy any trace of your research and save the survivors on the station.

Scam.

To anyone wondering, this person is a scammer.

You pay £15 for the software which only supports 3 usb devices, you have to pay another £6 for the unlocked software, yes, that's right, you are paying £15 for locked software.

And now the scammer is deleting my posts, that's fine though as I will keep posting them.

He's not even trying to justify what he is doing.

If he thought what he was doing was OK then he would put me in my place, but no, he just deletes my posts. Stay away from this software.

Edit, I have now been banned from the forum for telling people the truth.

Here is a screenshot.

apparently, I have been banned because me telling you this is a scam is not helpful.

<http://imgur.com/EeMgN1W>. Wasn't a bad game but not worth the price tag and community is dead. If you can get it on sale and play with friends then it's worth \$5 but otherwise I would skip this one.. Chances are that if you like the look of it or have liked games similar to it, then it's a safe bet. The updates are regular, large, and meaningful. I've zero regrets.. If you have Descent and enjoy playing the game then getting "The Delve" is a no-brainer!

It provides countless reply value that you can play co-op (which is fantastic) and it expands even more with the amount of physical expansions you have.

Definitely buy this and support FFG so they can release more content for Road to Legend :). This game is a wonderful addition to the english visual novel community. First things first, this game is hilarious. The dialogue and banter between the characters is so wonderfully hammy and ridiculous that it never failed to put a big smile on my face. The characters are all written in a very realistic manner. Each character is from a different time period, and the writers took great cares to make sure that they all felt like they truly were from those times. It touches upon some of the events during those time periods that effects the characters and their perceptions today, such as stigmas against sexuality, or sexual harrassment. The game balances a perfect blend of funny and serious, and excels at both without dropping the quality of one or the other. I sincerely love this game, though it is not without its faults. For one thing, the characters swear a LOT. If you don't care for a ton of swearing in games, this might not be for you. Furthermore, the game more or less follows one plotline throughout the routes, so once you play one route, you'll be repeating a few steps each route. It's not as bad the first couple of times, but can get kind of annoying the 4th or 5th time through. The art style can take some getting used to, though I personally don't find it disagreeable, I know some others dislike the cartoony look. Finally, the game sports a tiny amount of CGs, I believe it is like 2 or 3 route exclusive ones per route, which is rather small. It isn't terrible, but it's something to watch out for if you're bothered by that kind of thing. All in all, I believe that the game is still a wonderful, enjoyable time that manages to be thought provoking and touches upon many issues that aren't explored in many games. I believe that the biggest thing that makes me truly believe in it is that it touches upon forgiveness. Many of the characters have done wrong in the past, and these actions eventually come to light in the route, and each of the

characters are forced to face this ugly wrongdoing head on. It's up to the player whether they want to forgive the person or not, and I think that that is a very poignant story device that is fitting in today's world, with so many people who scrutinize others to such extreme degrees that they refuse forgiveness in any shape or form. It is truly thought provoking and is a fantastic examination of today's social landscape. All in all, I'd heavily recommend the game despite its faults.

This game is so fun for local multiplayer! It's like a crazy retro-styled air hockey!. Seriously one of the best and most addicting VR games I've ever played. Don't let it's simple premise fool you: you will in fact get a huge rush jumping from building to building to it's smooth techno soundtrack.. Kinda like a 'Reverse Pikmin' game. You lead a thing around, make it eat things, and sometimes a thing that the thing eats makes it do a thing, then you use the thing to solve puzzles created by other things. It's cute and it's fun and it's just short enough not to get repetitive, even when going for 100%.. 4 dollars to press space?

Okay?

I got the game for free form humble bundle but it's just a waste of time.. 10/10

Great gameplay. Takes a true god to beat this game.

Would play again. Gameplay\review (8 min): <https://www.youtube.com/watch?v=58myxy8LEIc>

[Awesome game but with some flaws. If you like zombie games \(like I do\) then you will most likely find it enjoyable. The first few waves were way too easy for me so that made it a bit boring at first. But as soon zombies started to appear more frequently it immediately got more exciting.](#)

[The weapons must be realistically reloaded and that adds an extra challenge. It's great because otherwise it would simply get too easy and boring.](#)

[I've played it for over an hour now and only experienced two bugs and neither of them caused any major issues. To me that's very impressive seeing as this is still an early release.](#)

[Right now I think it's a bit overpriced for the experience which I had \(but not by a lot\). It seems a little to basic at the moment and doesn't offer much of variation in terms of gamemodes or similar. **But, seeing as this is an early release and that the developers have promised more features it won't affect my final verdict too much.**](#)

[As a whole I enjoyed the game and do recommend it to anyone else who like wave shooters and zombies.](#)
